EDUCATION

University of Nebraska at Omaha

August 2023 – Present

Bachelor of Science in Computer Science

Omaha, NE

- Concentration: Software Engineering | Expected Graduation: May 2028
- Relevant Courses: Intro to Computer Science 1, Intro to Computer Science 2, Object Oriented Programming, C Programming, Data Structures, Computer Organization, Intro to Information Systems, Modern Mainframe and COBOL, IT Ethics, Applied Statistics, Intro to Web Development, Devops and Platform Engineering, College Algebra, Applied Algebra, Trigonometry, Calculus 1, Linear Algebra, Discrete Math, Math Proofs

TECHNICAL SKILLS

Languages: Java, Python, C, COBOL, JCL, SQL, JavaScript, HTML/CSS

Technologies: Spring Boot, JUnit 5, React.js, Tailwind CSS

Developer Tools: Git, GitHub, IntelliJ IDEA, PyCharm, VS Code, Eclipse IDE, OpenCobolIDE

EXPERIENCE

Fiserv Inc.

June 2025 – August 2025

Software Engineer Intern

Omaha, NE

- Contributed to redevelopment of a Banking Portal backend using Java and Spring Boot, collaborating with a team of 8 interns in an Agile environment
- Built backend components (data models, REST controllers) to support features like client document viewing as PDF and Zip file
- Assisted in testing and maintenance of production COBOL systems responsible for credit card transaction processing for major U.S. banks

Fiserv Inc.

June 2026 – August 2026

Software Engineer Intern

Omaha, NE

- Developed and enhanced mainframe functionality using COBOL, including adding secondary contact information to dialer files for improved downstream processing
- Executed SQL queries in a DB2 mainframe environment to validate application functionality and support testing of transaction-processing workflows
- Posted non-monetary transactions to batch, ensuring accurate transaction handling within the mainframe system
- Enabled PCF checks for non-monetary transactions, strengthening validation and control mechanisms within transaction-processing workflows
- Utilized Devin AI for making code changes based on a design document

PROJECTS

Personal Website | *React.js, HTML, Tailwind CSS, JavaScript*

July 2025

- Developed a responsive and accessible personal website using React.js and Tailwind CSS, showcasing portfolio and professional information
- Implemented dynamic components and smooth navigation to enhance user experience and engagement
- Optimized website performance through code splitting and efficient asset management

Shipping Data Analytics | *COBOL*

April 2025

- Engineered a COBOL program to process shipping data and generate summary reports as flat files
- Designed record layouts for input and output files, structuring data for efficient read/write operations
- Delivered destination-wise annual summaries of package counts and total revenue in a formatted report
- Implemented logic to parse shipping records and transform raw data into actionable insights

ADDITIONAL INFORMATION

Certifications: Work Smarter with Microsoft Excel, Work Smarter with Microsoft PowerPoint

Interests: Chess, Cooking, Traveling, Hiking, Badminton, Photography
